

CALL FOR ROUNDTABLE PROPOSALS

IV International Symposium on Mycorrhizal Symbiosis in South America: Diversity and Value of Mycorrhizal Symbiosis for Future Ecologies **August 24-28, 2026** **Quito, Ecuador**

Dear colleagues,

In the context of our **IV International Symposium on Mycorrhizal Symbiosis in South America: Diversity and Value of Mycorrhizal Symbiosis for Future Ecologies**, to be held in Quito, Ecuador, from August 24 to 28, 2026, we call for proposals for roundtables organized around the symposium's thematic sessions. The purpose of this space is to gather specialists in areas of common interest to present and discuss advances, innovative approaches, and emerging proposals, aiming to generate an integrative synthesis.

Each roundtable will be coordinated by one or two responsible persons, who will also act as moderators during the oral presentations. It will be the responsibility of the organizers to select and invite the participants and prepare a proposal that will be evaluated by the scientific committee for final acceptance.

Roundtables will have an approximate duration of 1 hour, with freedom to define the internal structure. It is suggested to include an introductory presentation and a final synthesis to facilitate general discussion.

Those wishing to submit a proposal must ensure the necessary funding for the participation of invited individuals, if required. The symposium organization currently has no funds allocated for this purpose.

Proposals must be sent **by March 31, 2026** to: micorrizas.sudamerica2026@gmail.com

Each proposal must include:

1. Roundtable title and brief summary/justification.
2. Symposium thematic area in which it fits.
3. Name, institution, and email of the organizer(s).
4. Preliminary list of invited participants, indicating name, institutional affiliation, email, and provisional titles of their contributions or role in the roundtable.

Decisions on the acceptance of roundtables will be made by the scientific committee and communicated by email **from April 30, 2026**.

For any inquiries, please write to us at micorrizas.sudamerica2026@gmail.com

See you in Quito!

Scientific Committee
